**Predictable
impressions
for your
unpredictable day**

A successful procedure starts with the right materials

Everyday impressions

3M™ Imprint™ 4 VPS Impression Material

Make precision an everyday occurrence. Imprint™ 4 VPS Impression Material provides:

- Sufficient time to load and seat the tray - no stressful race against the clock.
- Reduced chair time and stress for patients - Imprint 4 material has the shortest intra-oral setting time among leading VPS fast-setting impression materials.

Imprint™ 4 VPS
Impression Material

For bigger challenges and implants

3M™ Impregum™ Polyether Impression Material

The less pressure you're under, the better you work. For challenging cases, Impregum™ Polyether Impression Material gives you:

- Moisture tolerant for void-free impressions.
- Sustained flowability throughout a long working time.
- Snap-set behaviour - setting doesn't start until working time ends.

Impression Material

An easy step into digital dentistry

3M™ True Definition Scanner

Proven to be more accurate - and more consistently accurate - than other leading intraoral scanners, the 3M™ True Definition Scanner helps eliminate remakes and adjustments.¹ The innovative design allows for fast, easy and comfortable scanning. Plus, the low cost of entry enables you to take the step into digital impressioning.

Gain control of your impression start to finish

Before the procedure:

Prepare in advance

The 3M™ ESPE™ Intra-oral Syringe can be pre-filled up to 12 hours in advance without the material setting so you can prepare for your daily case load.

The impression procedure:

Efficient tissue prep and precise dispensing contribute to a successful procedure.

Manage tissue gently

The 3M™ ESPE™ Retraction Capsule with its extra-fine tip offers a fast and gentle way to retract gingival tissue and control bleeding.

Syringe more precisely

Apply wash materials with extreme accuracy and less waste. The 3M™ ESPE™ Intra-oral Syringe enables easy handling and intra-oral access.

on from

Skip the tray adhesive

Save time with the ready-to-use 3M™ ESPE™ Impression Tray. Simply fill directly from the mixing device. The unique design controls material flow, minimizing defects and voids. And the fleece strip replaces messy, time-consuming tray adhesives.

Automix fast and easily

Cut down on steps, waste, mess and hand fatigue. With the push of a button, get a homogenous mixture and deliver just the right amount, whether it's Imprint 4 or Impregum materials.

- Pentamix™ 3 Automatic Mixing Unit is the smallest, fastest automix device on the market, perfect for high-volume practices.
- Affordable Pentamix™ Lite Automatic Mixing Unit is the lightest automix unit available. Easy to carry and store, it's ideal for practices with multiple operatories.

Make better impressions

3M gives you exactly what you need to help simplify the process and achieve consistent clinical results.

How you get there: With products that set fast yet give you enough working time. Ingenious tools that streamline the procedure. And troubleshooting tips to help you ace your impression, so restorations fit.
