Keep it simple.

3M™ RelyX™ Cements
For nearly 50 years, dental practitioners around the world have relied on the strength, ease of use and reliability of 3M Brand Cements to simplify their procedures and help keep their patients smiling.

When it has to hold, rely on 3M™ RelyX™ Cements.

For nearly 50 years, dental practitioners around the world have relied on the strength, ease of use and reliability of 3M Brand Cements to simplify their procedures and help keep their patients smiling.
3M Brand Cements are a family of clinically proven cementing technologies designed to handle virtually any indirect procedure with just one or two components. They are formulated to provide strong, dependable adhesion, excellent aesthetics and reduced post-op sensitivity.

By combining ease of use with industry-leading performance, 3M Brand Cements help give you more freedom to work the way that works best for you.

**3M™ RelyX™ Ultimate Adhesive Resin Cement**
An adhesive resin cement that uses just two components to provide industry-leading bond strength

**3M™ RelyX™ Unicem/Unicem 2 Self-Adhesive Resin Cement**
A clinically proven, self-adhesive resin cement that is the “go-to” solution for a wide range of procedures

**3M™ RelyX™ Luting Plus Resin Modified Glass Ionomer Cement**
Easy-to-use porcelain fused to metal (PFM) and pediatric crown cement with fluoride release

Standardizing your practice on 3M Brand Cements ensures that you will achieve reliable, predictable results, time after time. It also helps simplify your inventory and speed up your procedures, so you can focus on delivering the best possible outcomes for your patients.
**Common indications:**

- CAD/CAM glass ceramic restorations/veneers
- Applications requiring maximum bond strength

**RelyX™ Ultimate Adhesive Resin Cement**

RelyX™ Ultimate Adhesive Resin Cement combines high bond strength and excellent aesthetics with ease of use, to deliver predictable outcomes.

- Industry-leading bond strength
- Two-component system enables faster, easier procedures with fewer working steps
- More flexibility – allows for total etch, self-etch or selective etch with just one adhesive
- Delivers first-class aesthetics with natural fluorescence

**Keep it simple**

RelyX™ Ultimate Adhesive Resin Cement requires fewer components than most competing adhesive resin cements.
For simplicity, convenience and reliability, RelyX™ Unicem Self-Adhesive Resin Cement is your “go-to” product for a wide range of indications. With its dual-cure self-adhesive chemistry, RelyX™ Unicem Cements deliver high adhesion, resistance to discoloration, long-term stability and more:

- The world’s most clinically proven self-adhesive resin cement
- Saves time by eliminating etching, priming and bonding steps
- Strong
- Virtually no post-op sensitivity
- Moisture tolerant
- Endo tips make cementing posts easy and reliable
Versatile RelyX™ Luting Plus Resin Modified Glass Ionomer Cement offers better bond strength than conventional glass ionomer luting cements. This formula is for a wide range of everyday applications, including PFM s, metal and pediatric crowns and restorations on implants.

• 5-second tack light-cure feature for “cleanup on demand”
• Higher bond strength than conventional glass ionomer
• Virtually no post-op sensitivity
• Easy-to-use delivery
• Sustained fluoride release
• A good choice for pediatric restorations
• Moisture tolerant after tack cure
Common indications:
Bonding thin porcelain veneers

3M™ RelyX™ Veneer Cement

Combines ease-of-use with outstanding aesthetic results
- Customer-preferred shading system
- Extremely colour stable
- Matching try-in pastes
- Light-cure formula
- Easy handling and cleanup
Common indications:
Temporary restorations

3M™ RelyX™ Temp NE Temporary Cements

The ideal balance of reliable retention and easy removal for provisional cementation.

- Reliable temporary adhesion
- Quick, easy excess removal
- Easy removal of provisional
- Non-eugenol formulation
Common indications:
Post and core procedures

3M™ RelyX™ Fiber Posts

Engineered for performance and simplicity, 8 years clinical success.

- Dentin-like elasticity for a lower risk of root fracture (compared to metal/ceramic posts)
- Outstanding mechanical strength
- Excellent light translucency
- Requires no pre-treatment, when used with RelyX™ Unicem Cements
Cement selection made easy.
